

TECHNICAL DATA SHEET

QUINTOLUBRIC® 918

FIRE RESISTANT HFA-S HYDRAULIC FLUID

QUINTOLUBRIC® 918 is delivered as a concentrate forming a true solution when mixed with water.

QUINTOLUBRIC® 918 can be applied in a range of water types varying from very soft to very hard, whereby the recommended water hardness up to 42° dH (Z-water). The concentration-in-use will depend on the application and on the properties of the process (make-up) water.

Because of the large number of water types available, specific recommendations on the usage of QUINTOLUBRIC® 918 should be solicited from QUAKER HOUGHTON.

Applications

QUINTOLUBRIC® 918 is a fully biocide free, fire resistant hydraulic fluid type HFA-S.

QUINTOLUBRIC® 918 is entirely synthetic and when mixed with water it forms a true solution.

QUINTOLUBRIC® 918 is easily mixable with water and has an outstanding stability in water with hardness up to 42° dH. It has an excellent corrosion protection on multi metals commonly used in hydraulic systems.

QUINTOLUBRIC® 918 brings an outstanding bioresistance and a highly stable pH of the solution over time.

Recommendation for Use

The standard concentration range for QUINTOLUBRIC® 918 is 1.5 – 3.0 %.

Benefits

- Fully biocide free
- Outstanding bioresistance
- Excellent corrosion protection
- Low Water Hazard Class (WEC/WGK 1)

Health, Safety and Handling

Please consult the Safety Data Sheet (SDS) for information on storage, safe handling and disposal. The conditions or methods of handling, storage, use and disposal of the product are beyond our reasonable control - we assume no liability for any ineffectiveness of the product or any injury or damage, arising out of or in connection with these conditions.

Typical Physical Properties

PROPERTY	TYPICAL VALUE	UNIT
Test	Result (Concentrate)	
Appearance	Clear yellow to amber liquid	
Specific Gravity at 15°C	1,02	g/cm3 (ASTM D1298)
pH (neat)	9,7	
Pourpoint	-3	[°C] ASTM D97
Test	Result (2% solution in V water)	
Appearance	Clear fluorescent liquid	
Corrosion Protection	Pass all metals	DIN 51345
Emulsion stability	1A-1R (stable)	DIN 51346 (25 days @50°C)

All reasonable care has been taken to ensure this publication is accurate upon issue. Such information may be affected by changes subsequent to issue. This Technical Data Sheet is to be used solely for this product. Prior to any use, consult the Safety Data Sheet (SDS) for information on hazard risks and product use parameters.
